

CAF cards

A New Direction for Assessment

CAF Cards have been specifically developed to help practitioners fully *engage* and *empower* young people in the common assessment process.

CAF Cards have been designed with young people and can be used in one to one situations and in groups. They enable young people to express their thoughts and feelings in relation to the 19 CAF categories. They can also be used with parents.

The CAF cards can also work as a standalone resource for other types of intervention. They are ideal for any young person that may benefit from exploring their own life experiences, in order to map out a more effective route to success.

In order to use the CAF cards and Road Sign Cards we offer a days training and each participant receives a boxed set of CAF Cards and a hand book.
